

Mechanical Engineer/ Designer

MECCO Marking & Traceability, a manufacturer of marking equipment located in Cranberry Township, PA, is seeking a Mechanical Engineer/ Designer.

We, at Mecco, are passionate about offering unparalleled service to our customers. We provide innovative designs for part identification & traceability applications. We serve the needs of the semiconductor, defense, medical, automotive, industrial and oil & gas industries by offering a full line of laser and dot peen marking solutions.

Position Summary: The qualified candidate will be responsible for the mechanical design and development of both laser and dot peen marking equipment including material handling for both manual and automated loading. This candidate will work closely with our engineering team and our customers to develop innovative solutions for their specific marking requirements.

The candidate must have strong verbal and written communications skills in order to work effectively with others in the team and to provide our customers with the best experience. This candidate must have the skills to be a productive member of the team and have the ability to lead the team with assigned projects.

Requirements include: Associates degree or equivalent technical schooling, electrical and mechanical skills. 3 years experience in AutoCad, designing and building automated systems, project management and a good understanding of electrical controls. Autodesk Inventor and marking industry experience a plus. Some travel required.

We offer a comprehensive benefit package. Please forward resume', including salary history, to:
